ARTICLES

Achenbaum, Alvin A., Russell I. Haley, and Ronald Gatty
On-Air versus In-Home Testing of TV Commercials. No. 4, pp. 15-19
In-home tests gave more reliable results, but neither method gave better sensitivity.

Assael, Henry, John H. Kofron, and Walter Burgi.
Advertising Performance as a Function of Print Ad Characteristics. No. 2, pp. 20-26
Relative recognition of an industrial advertisement was most closely related to whether it was a spread insert and the amount of its illustrated area.

Axelrod, Joel N. **A Validation of Murphy's Law.** No. 3, pp. 45-47
This pioneering study confirms our suspicion that in advertising research, "If something can go wrong, it will."

Backman, Jules. **International Comparisons of Advertising Input and Output.** No. 4, pp. 3-8
Since different types of data are produced in different countries it is difficult to compare investments in advertising and the returns on them.

Barrow, Lionel C., Jr. **On Methods: New Uses of Analysis of Covariance.** No. 4, pp. 49-54
Use covariance analysis to correct mismatched samples and to increase chances of finding significance.

Benson, Purnell H.
Individual Exposure to Advertising and Changes in Brands Bought. No. 4, pp. 27-31
Per dollar of advertising, magazines apparently can sell more toothpaste than television can.

Brown, Nigel A. and Ronald Gatty.
Rough versus Finished TV Commercials in Telpex Tests. No. 4, pp. 21-24
Telpex roughs elicited about the same responses from studio audiences as did finished TV commercials.

Burgi, Walter. See Assael, Kofron, and Burgi.

Cohen, Louis. **The Differentiation Ratio in Corporate Image Research.** No. 3, pp. 32-36
Don't ask the respondent to state the attributes of the "ideal" company; instead infer them from his ranking of all companies studied.

Cook, Victor J. **Group Decision, Social Comparison, and Persuasion in Changing Attitudes.** No. 1, pp. 31-37
In a laboratory setting the most effective way of changing attitudes toward the Volkswagen was to have a socially homogeneous group perform a group decision task.

Dunn, S. Watson. See Lorimor and Dunn.

Ehrenberg, A. S. C. **The Neglected Use of Data.** No. 2, pp. 2-7
Analysis of existing data makes possible effective interpretation of new comparable data.

Ekeblad, Frederick A. and Stanley F. Stasch. **Criteria in Factor Analysis.** No. 3, pp. 48-57
The authors describe the basic factor analysis model, explain the importance of optimization criteria and note which criteria are appropriate for different problem types.

Frank, Ronald E. **Is Brand Loyalty a Useful Basis for Market Segmentation?** No. 2, pp. 27-33
No. Brand loyal customers were not identifiable by socioeconomic or personality characteristics, did not have different average demand levels from nonloyal customers, and did not differ in sensitivity to promotion.

Gatty, Ronald. See Achenbaum, Haley, and Gatty.

Gatty, Ronald. See Brown and Gatty.

Haines, George H., Jr. and Alvin J. Silk.
Does Consumer Advertising Increase Retail Availability of a New Product? No. 3, pp. 9-15
Not in any straightforward way, according to this admittedly limited review of relevant data.

Haley, Russell I. See Achenbaum, Haley, and Gatty.

Haug, Arne F. See Myers and Haug.

Ito, Rikuma. **Differential Attitudes of New Car Buyers.** No. 1, pp. 38-42
In this study of Ford and Chevrolet owners, differential measures of attitudes to automobiles were able to distinguish potential loyal buyers and switchers to a competitive make.

King, William R. **Structural Analysis and Descriptive Discriminant Functions.** No. 2, pp. 39-43
A combination of subjective evaluations with objective statistical techniques increases the manager's predictive power and helps evaluate his organization's decision making process.

No. Brand loyal customers were not identifiable by socioeconomic or personality characteristics, did not have different average demand levels from nonloyal customers, and did not differ in sensitivity to promotion.

Gatty, Ronald. See Achenbaum, Haley, and Gatty.

Gatty, Ronald. See Brown and Gatty.

Haines, George H., Jr. and Alvin J. Silk.
Does Consumer Advertising Increase Retail Availability of a New Product? No. 3, pp. 9-15
Not in any straightforward way, according to this admittedly limited review of relevant data.

Haley, Russell I. See Achenbaum, Haley, and Gatty.

Haug, Arne F. See Myers and Haug.

Ito, Rikuma. **Differential Attitudes of New Car Buyers.** No. 1, pp. 38-42
In this study of Ford and Chevrolet owners, differential measures of attitudes to automobiles were able to distinguish potential loyal buyers and switchers to a competitive make.

King, William R. **Structural Analysis and Descriptive Discriminant Functions.** No. 2, pp. 39-43
A combination of subjective evaluations with objective statistical techniques increases the manager's predictive power and helps evaluate his organization's decision making process.

Kofron, John H. See Assael, Kofron, and Burgi.

Kuehn, Alfred A. and Albert C. Rohloff. **Fitting Models to Aggregate Data.** No. 1, pp. 43-47
"Goodness of fit" is only one of many criteria for judging a model, and it does not necessarily indicate a cause-and-effect relationship.

Langhoff, Peter. **Options in Campaign Evaluation.** No. 4, pp. 41-47
To trace how successful a campaign is, use vector psychology to chart consumer reaction.

Lorimor, E. S. and S. Watson Dunn.
Four Measures of Cross-Cultural Advertising Effectiveness. No. 4, pp. 11-13
Scores on evaluation, evaluation-difference, and willingness to buy were correlated, but comprehension did not correlate with them.

Lo Sciuto, Leonard A., Larry H. Strassmann, and William D. Wells.
Advertising Weight and the Reward Value of the Brand. No. 2, pp. 34-38
This laboratory simulation of advertising messages suggests that brand superiority combined with advertising dominance is the most effective way to induce "purchase" and "brand loyalty."

Marantz, Marcel. **Evaluating Department Store Advertising.** No. 1, pp. 16-21
Measure the effectiveness of department store advertising by noting its impact on the weekly moving average sales curve.

Marder, Eric.
How Good Is the Editorial-Interest Method of Measuring Magazine Audiences? No. 1, pp. 2-6
Not perfect, according to this study. Many respondents did not recall looking into magazines they had previously been observed reading.

Matricon, Claude-Pierre. **A New Measure of Advertising Effectiveness.** No. 4, pp. 33-39
Advertising which improves brand attitudes of an individual with low probability of seeing the ad is more effective than advertising which produces the same effect on an individual with high exposure probability.

McGlathery, Donald G.
Claimed Frequency vs. Editorial-Interest Measure of Repeat Magazine Audiences. No. 1, pp. 7-15
Compared with estimates from the editorial-interest technique, answers to direct questions on reading frequency tended to overestimate for monthly magazines and to underestimate for weeklies and bi-weeklies.

Mitchell, Walter G. **Systematic Synthesis of Advertising Research Verbatims.** No. 3, pp. 37-40
Verbatim responses fall into one or more of five categories and may be synthesized by a vector diagram revealing their general direction.

Myers, James H. and Arne F. Haug.
Declarative vs. Interrogative Advertisement Headlines. No. 3, pp. 41-44
Interrogative headlines were not remembered any longer than the same headlines in declarative form.

Parfitt, John H. **A Comparison of Purchase Recall with Diary Panel Records.** No. 3, pp. 16-31
Housewives can accurately recall purchasing behavior only for frequently bought products in the recent past.

Rohloff, Albert C. See Kuehn and Rohloff.

Rotzoll, Kim B. **The Effect of Social Stratification on Market Behavior.** No. 1, pp. 22-27
This review of the literature suggests two consumption loci—the "level of the Common Man" for the Lower-Middle class and below, while the Upper-Middle class refer to the Upper class locus.

Silk, Alvin J. See Haines and Silk.

Simon, Raymond. **Responses to Personal and Form Letters in Mail Surveys.** No. 1, pp. 28-30
Contrary to expectation, a form letter produced greater returns than a personal letter—from a target population of employees.

Stasch, Stanley F. See Ekeblad and Stasch.

Strassmann, Larry H. See Lo Sciuto, Strassmann, and Wells.

Swanson, Charles E. **The Frequency Structure of Television and Magazines.** No. 2, pp. 8-14
Factor analysis of frequencies of viewing 108 nighttime network TV programs, and 44 consumer magazines reveals underlying patterns of audience habits.

Wallerstein, Edward. **Measuring Commercials on CATV.** No. 2, pp. 15-19
This sensitive method gives absolute control over exposure of commercial to two samples of homes wired to a modified CATV system. On-the-air commercials can be blocked out and test commercials simultaneously substituted in one or both test samples.

Wells, William D. See Lo Sciuto, Strassmann, and Wells.
